

Truck Traffic Congestion Lane Knutwilerhöhe

Client

Federal Roads Office ASTRA
 Zofingen Branch

Site supervision

IUB Engineering AG

Construction period

2009–2010

Construction costs

CHF 2.2 million

Service provided

- Site supervision
- Completion works

Description

A truck flow regulation point was constructed on the A2 National Road southbound at Knutwilerhöhe. The existing hard shoulder was widened by 2m. A new cable run with ducts was laid along the hard shoulder. New street furniture such as emergency telephones, lighting, road signs and road drainage were installed or moved. A new crash barrier and new road markings were also added along the entire length.
